#### NEW BUILDING

The focus of ordering this week is on the dry market. Jiangsu Ocean Shipping (JOSCO) have announced an order for four firm 64,000dwt Ultramax split between NACKS and DACKS. Delivery is due from 2H 2022. MOL (for Tohoku Electric Power) announced an order at Oshima for a single 99,000dwt post-panamax bulk carrier for delivery in 2022. Penglai Jinglu announced orders for six firm 10,000dwt mini bulkers for Tianjin Zhongxin similarly for 2022 delivery.

#### RECYCLING

The stability witnessed in the market this week has provided a much-needed backbone for Cash Buyers and brokers to work off. These levels are seemingly in tandem with the recyclers themselves who also feel bullish going into the Christmas and New Year period and remain confident that these levels are here to stay for the foreseeable future. With these firm rates being vocalised, Owners have been encouraged to explore this avenue as we are certainly seeing more larger dry units (Capes and VLOC's) being proposed providing the market with some satisfying activity.

We are also seeing Turkey continuing with its positive sentiment with price levels now hovering around \$230/per ldt for HKC recycling, rising off the back of the global steel markets which remain firm, thus continuing to help prop the market locally with the Turkish lira weakening 3.5% over the last 7 days. Despite this, the Aliaga recyclers remain eager for tonnage as we approach the end of the year with the main focus being tonnage that legally required recycling at the EU approved yards – Turkey remains the only commercially viable option for Owners at this present time in this respect.
